Third Year students will each give a research talk followed by our TSGP “Spring Fling” at the Narragansett Brewery!

Alberta, Canada

Jenn Dumouchel attended a Keystone Symposium on Regular RNA Emerging Mechanisms and RNA Modifications in Health and Disease (Banff, Alberta, Canada, December 12th - 15th, 2023). This meeting provided opportunities to discuss RNA in the context of their chemical modifications, new technologies to study biological mechanisms, and the exciting potential of RNA-based therapeutics.

Jenn presented her recent research entitled:
“tRNA methyltransferase 1 promotes nervous system development.”

Later in the week, she had an opportunity to take in the stunning scenery by skiing at Lake Louise!
